freestanding fire brigade benches

Locks and colours for firefighter lockers

Locks

The private and valuables compartments of the firefighter lockers can be equipped with various locks. We offer a wide range of different locks. The models shown are examples and only show one variant in each case.

Colour variants

All firefighter lockers are finished with a high-quality powder coating. The RAL colours listed below are available for painting the corpus and doors. To provide long-lasting corrosion protection, we also recommend additional galvanising.

Other colour variants are available at an extra charge.
