compartment numbering

socket outlet in the private compartment

mobile substructure

rail system for wall assembly

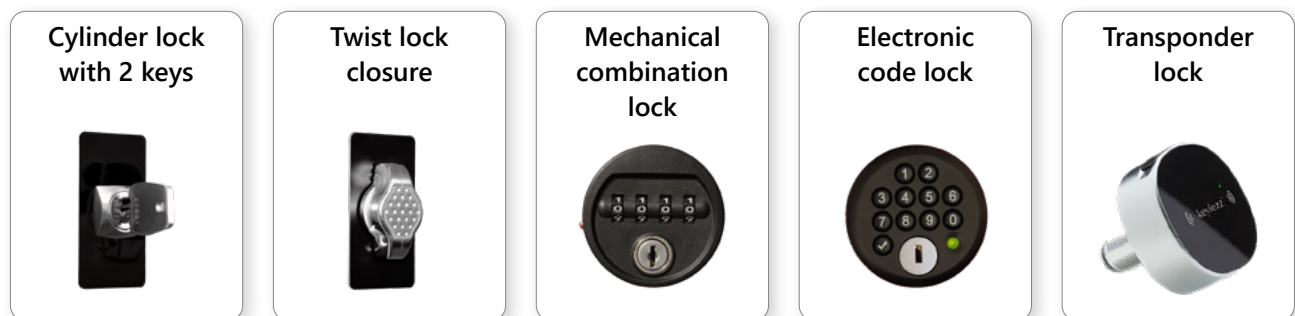

freestanding fire brigade benches

Locks and colours for firefighter lockers

Locks

The private and valuables compartments of the firefighter lockers can be equipped with various locks. We offer a wide range of different locks. The models shown are examples and only show one variant in each case.

Colour variants

All firefighter lockers are finished with a high-quality powder coating. The RAL colours listed below are available for painting the corpus and doors. To provide long-lasting corrosion protection, we also recommend additional galvanising.

Other colour variants are available at an extra charge.
